MEMORANDUM FOR THE RECORD

SUBJECT: Proposed Retirement Act Amendments

1. This date Mr. Maury met with Colonel White to review retirement legislation.

2. The proposed Retirement Act amendments listed in the attached chart (compiled in late 1968) were reviewed and except for the two most important items, a rather arbitrary order of priority agreed to. The two most important items are: in the long run, funding which is tied into the completion of the actuarial study and, in the near term, retirement quota.

3. Action. Colonel White will brief the Director and request concurrence for contacting the staff members of our Subcommittee (as soon as we get our funding proposal and firm projected retirement figures together) to alert them to our legislative needs and to obtain their advice as to whether we ought to submit a package this session or wait for the 92nd Congress.

4. I advised [REDACTED] of the above, and told them that I did not believe the exact makeup of the eventual legislative proposal is limited to items on the attached chart.
